- Experienced in manual and CNC type machining processes using a wide variety of machine tools.
- Experienced in manual and CNC type machine set-ups, monitoring, change-outs, etc.
- Working knowledge of a wide variety of inspection devices to inspect components produced.
- Written and verbal communication skills, ability to work cooperatively with other team members.
- Willingness to learn and at times teach others.

REPORTS TO: Value Stream Leader

LOCATION: Elmira, NY

RESPONSIBILITIES: This position is responsible for the set up and operation of both conventional and CNC machining equipment to produce components efficiently and accurately. The machinist will load / unload parts on machines to support maximum spindle utilization time, perform in-process inspection of machined parts to verify conformance to customer requirements, monitor parts as they are completed on the machine, and detect malfunctions in machine operations, such as worn or damaged cutting tools. The position runs production lots, communicates with co-workers regarding productions runs, and maintains a safe, organized and clean work environment.

Familiarity with Lean Manufacturing work area practices including 5-S, Visual Controls, Standard Work, work center metrics, and continuous improvement processes and supports team members in these processes. While performing all duties and responsibilities, the Machinist will at all times, model Hardinge Inc. values and principles and act in a manner consistent with the Hardinge Inc. Code of Conduct and Ethics.

We offer a competitive salary and benefit package including health insurance, life insurance, 401K, paid vacation, paid holidays and long term disability. Premium pay for 2nd shift is at base hourly pay x 15%.

Hardinge Inc. is an Equal Opportunity Employer, Veteran/Disability
